REMARKS

Applicants would like to thank Examiner Monshipouri for the courtesy of her telephone call on September 9, 2005. During that call, Examiner Monshipouri advised Applicant's attorney that the current priority claim provided insufficient detail regarding the relationship of the priority applications to the instant application. Accordingly, in an earnest effort to advance issuance of the instant application as a U.S. Patent, Applicants are providing this amendment to the specification. In particular, Applicants have amended the priority claim to provide sufficient detail regarding the relationship of each priority application to the instant application. No new matter is added by this amendment and entry is respectfully requested.

Respectfully submitted,

Kathleen A. Tyrrell
Registration No. 38,350

Date: September 9, 2005
